Cardiac Care Program

- Medication assessment, teaching, and management for prevention of complications related to new medication or medication changes.

- Telemedicine for daily in-home monitoring of vital signs/weights and nursing contact as appropriate.

- 24/7 Triage nursing which is instrumental in preventing ED visits and decreasing re-hospitalization rates. On call nurses respond to emergent triage calls.

- Palliative Care and symptom management for patients with End Stage Heart Disease. Our medical director for Palliative Care is available for consultation and home visits in Monroe County.

- Infusion Pharmacy for IV therapy in the home such as diuretics, Milrinone, and antibiotics. Our IV Lasix treatment plan is also available. **

- Clinically expert care of LVAD patients.

- Collaboration and close communication with you, and the other health care team members for optimal outcomes and disease management.

- Rehab services (P.T, O.T, S.T) to build endurance and strength while improving overall functioning and safety in the home.

- Social Work to assist with linking to community resources and long term planning for your patients’ ongoing needs.
