Women’s Health Program

Lifetime Care offers specialized in-home care for women who have had breast surgery (such as a mastectomy, reconstruction or reduction) or a hysterectomy or bladder repair.

Goals:

• Promote optimal healing and prevent post-surgical complications
• Promote improved quality of life by providing support during the healing process

Services include:

• Nursing visits include a comprehensive assessment, including vital signs and pain
• Wound, foley catheter or JP drain care
• Performing and teaching dressing changes and surgical site care
• Medication teaching
• Emotional support
• Referrals to other disciplines such as occupational therapy, physical therapy and social work
• Links to community resources when needed

We collaborate closely with physicians, and we have experienced nurses on site at all area hospitals to help arrange transition from inpatient care to home care.
